Company Information

For more than 60 years, Simpson Strong-Tie has focused on creating structural products that help people build safer and stronger homes and buildings. A leader in structural systems research and technology, Simpson Strong-Tie is one of the largest suppliers of structural building products in the world.

The Simpson Strong-Tie commitment to product development, engineering, testing and training is evident in the consistent quality and delivery of its products and services.

Simpson Strong-Tie Australia product lines include:

- Fastening systems including Quik Drive® auto-feed screw driving systems
- Simpson Strong-Tie® anchors and fasteners for concrete and masonry
- Repair, Protection, and Strengthening systems
- Structural connectors for timber construction

For more information, call **1300 STRONGTIE** or visit our website **strongtie.com.au**

General Terms and Conditions

1. The prices in this price list are subject to change with at least 30 days notice.
2. **Orders under \$300 (ex GST) will be subject to a \$20 surcharge. This does not apply to Warranty or Backorders.**
3. Delivery of orders are Free Into Store (i.e. delivered to normal place of trade) for all orders over \$300 (ex GST).
4. The Customer will be deemed to have accepted the goods as being in accordance with the order placed unless notified of a claim within 14 days of receipt of the goods.
5. Any and all returns must be approved by Simpson Strong-Tie prior to return. Any return of goods will be subject to a 20% restocking fee.
6. Any goods to be returned must be in good saleable condition and accompanied by an original invoice number.
7. All accounts are Nett 30 days from date of statement.
8. All goods remain the property of Simpson Strong-Tie Australia until payment has been made in full by the Customer.

Frequently Asked Questions

1. **I have a Structural Timber Engineering question.**
Please contact our National Field Engineer.
2. **Is this price book still valid?**
Generally our Price Book is valid for 12 months. Please contact your Simpson Strong-Tie Area Manager for current price book detail.
3. **What is my price?**
This price book has list pricing, your discount needs to be applied to the corresponding purchase quantity. Please contact your Simpson Strong-Tie Area Manager for detail or email sales.au@strongtie.com.
4. **I have seen a Simpson Strong-Tie product on the internet that is not in the Price Book. How can I find out more information?**
Please contact your Simpson Strong-Tie Area Manager.
5. **Need a copy of your invoice?**
Please email accounts.au@strongtie.com with your purchase order number.

Collated Screws Exceed Values of Nails

- Eliminates subfloor nail squeaking and costly call backs
- Variety of lengths to cover subfloor, wall plates, and stair treads
- Our screws are designed draw subfloor and joist tightly together, giving visual confirmation of proper screw placement

Look for the yellow strip. Your guarantee of quality and performance from **Genuine Quik Drive Fasteners.**

Powder-Actuated Fastening Systems								
Semi-Automatic Tool								
	PT-27	Strip feed and manual cycle .27 caliber tool includes accessories and carry case	16 – 72 mm pins	707392649809	1	\$525.00	6	\$472.50

PAT Application Guide

General Notes

1. Average pin embedment into concrete is 19–32 mm.
2. To determine pin length for concrete: add fixture thickness and embedment depths.
3. To determine pin length for steel applications: add fixture thickness plus steel thickness plus 3 mm. Getting the point to pass through steel 3 mm maximises holding strength.
4. When selecting a load power level, it is recommended to make a test fastening with the lowest power level. If the powder load does not set the fastener, try the next highest load, and so on, until the fastener is properly set.

For fastening →	Timber (45 mm thick)	Timber (25 mm thick)	Plywood (19 mm thick)	Steel Fixtures/Conduit Clips (light steel)	Drywall Track
Concrete	72	52	42	27	19
Cement Block	72	52	42	27	27
Steel (5–6 mm)	62	32 (washed)	32 (washed)	19	16 (knurled)
Steel (6–8 mm)	62	42 (washed)	32 (washed)	19	16 (knurled)

1. To be used as a guide only—see General Notes
2. Recommended minimum embedment depth for maximum holding strength: Steel = 12 mm; Concrete/Cement Block = 25 mm
