

INTRODUCING YOUR SOLVENT FREE TOOLBOX HEROES

Bond, stick, seal... onsite or at home

Sikaflex®-111 Stick & Seal

- ▶ Solvent Free
- ▶ Flexible adhesive and sealant
- ▶ Can be used on Plastics such as PVC, EPDM, PA, PET
- ▶ Interior and exterior joint applications

Sikaflex®-112 Crystal Clear

- ▶ Solvent Free
- ▶ Crystal clear adhesive and sealant
- ▶ Bonds and seals most construction substrates
- ▶ Interior and exterior applications

Sikaflex®-118 Extreme Grab

- ▶ Solvent Free
- ▶ Very high initial grab
- ▶ Instant fixing of heavy objects
- ▶ Interior and exterior applications

BUILDING TRUST

Sikaflex®-111 Stick & Seal

FLEXIBLE ADHESIVE AND SEALANT

Sikaflex®-111 Stick & Seal is a multipurpose, flexible, adhesive and sealant with good adhesion to a wide range of common porous and non-porous construction materials. Sikaflex®-111 Stick & Seal is suitable for use in general interior and exterior joint sealing and bonding applications.

USES

Sikaflex®-111 Stick & Seal is designed for indoor and outdoor bonding of various substrates.

- Concrete
- Masonry
- Most stones
- Ceramic
- Wood
- Metal
- Glass
- Plastics such as PVC, EPDM, PA, PET
- Polystyrene EPS/XPS

A sealant to seal vertical and horizontal joints.

ADVANTAGES

- Internal and external use
- Easy to apply
- No sag flow
- Very low emissions
- Bonds to damp concrete
- Strong and elastic bond
- Bonds well to a wide variety of substrates without surface pre-treatment
- Compatible with most substrates, EPS/XPS, building wraps and bitumen
- Good mechanical resistance
- Good weathering resistance
- Adhesive-sealant with CE marking

Sikaflex®-112 Crystal Clear

TRANSPARENT ADHESIVE AND SEALANT

Sikaflex®-112 Crystal Clear is a one-component, multipurpose transparent adhesive and sealant with good initial grab which bonds and seals most construction substrates for internal and external use.

USES

An adhesive to bond most construction components and materials such as:

- Concrete
- Masonry
- Most stones
- Ceramic
- Wood
- Metals
- Glass
- PVC

A sealant to seal around bonded components.

ADVANTAGES

- 100% transparent
- Good initial grab
- Very low emissions

Sikaflex®-118 Extreme Grab

CONSTRUCTION ADHESIVE

Sikaflex®-118 Extreme Grab is a one-component, solvent and phthalate-free adhesive with very high initial grab.

USES

Sikaflex®-118 Extreme Grab is designed for indoor and outdoor bonding of various objects such as stones, bricks, window and door sills, mirrors, wood beams and heavy moldings.

Sikaflex®-118 Extreme Grab is designed for bonding:

- Concrete
- Mortar
- Natural stones
- Clinker
- Fiber cement
- Ceramic
- Wood
- Metals

ADVANTAGES

- Very high initial grab
- Fixing of heavy objects without temporary fixing
- Good workability
- Very low emissions
- Strong and elastic bond
